

Unique Group Marine & Subsea

We provide bespoke products and services for marine, offshore and subsea industry operations. Our specialist engineering proposition is underpinned by exclusive partnerships with leading global providers, including Kongsberg Maritime, Trelleborg Offshore, Norsafe, Hernis Scan, Renishaw, C&C Technologies and EMCE Holland.

Logistically, we're ready to support customer operations around the world. We have full service facilities in the Middle East, India, Russia, South Africa, Singapore, UK and USA.

Technically, we deploy more than 100 engineers and 120 technicians globally – primed to deliver the support you need, where and when you need it.

Commercially, customer satisfaction is our top priority. That's why we place a premium upon quality, efficiency and safety. We supply the best products and services available in the marine and offshore markets.

Merchant Marine

Our merchant marine solutions encompass **engine room automation, cargo control, tank gauging & measurement, navigation, communication, sensors, ship performance system, CCTV systems** and **lifeboats & fast rescue boats**.

We provide high performance equipment designed and engineered to operate safely and reliably under the toughest conditions – including potentially hazardous Zone 1, Zone 2 and Group IIC areas.

Offshore

We provide complete, state-of-the-art solutions to the offshore vessels and drilling industries through our various principals of European origin.

For **offshore vessels**, we provide systems for navigation & communication, automation & control, dynamic positioning, position reference, fire and gas detection, ESD and internal/external communication. We also provide winches/capstans, active and passive fire protection systems and lifesaving appliances/ safety systems.

For the **drilling industry**, our range includes thermal insulation, oil and marine hose, and bespoke engineering products: all high-integrity offshore solutions designed to meet your objectives in the most demanding environments.

Subsea

Efficient, swift and safe – our buoyancy modules for dynamic risers are used in over 90% of offshore floating production systems and we provide well proven subsea cable protection systems.
