Unique Group

Strength in Depth

As an independently owned global company, Unique Group leads the way in providing engineering expertise, sales and rental equipment and the latest technology for the marine, diving, pipeline and subsea market sectors.

Unique Group delivers bespoke, off-the-shelf engineering solutions and cost efficiencies across the oil and gas supply chain – onshore and offshore, surface and subsea.

Its 200-plus dedicated engineering specialists work across nine strategically important global oil and gas regions - USA, UK, Europe, Singapore, India, South Africa, Saudi Arabia , UAE and Qatar.

Unique Group employs over 500 people worldwide through its six multi-site divisions:

● Unique Group Office Location

History

Founded in 1993 with three employees, Unique Group – through its expanding network of companies – is today an international specialist in the provision of offshore and onshore services.

Unique System was established as an equipment rental, sales and service organisation, providing specialised products and services to the offshore oil, natural gas and maritime industries in the Middle East, India and Singapore.

As the group evolved, Unique System began operations in Houston in the USA, Aberdeen in the UK and Mumbai, India. It led to the establishment of a new holding company – Unique Maritime Group, subsequently renamed Unique Group.

Through a process of both organic growth and the targeted acquisition of companies, the group has continued to expand its services, capabilities and geographical infrastructure to better support customer requirements, regardless of their location.

Throughout these years of growth and service development, we have always focused on quality, innovation, service and speed of response."

Harry Gandhi,
Founder and CEO of Unique Group

Strength in Depth

It takes a unique company to provide in-depth support - offshore and onshore – above and below water.

Our benchmark, in everything we do, is excellence. It reflects our philosophy of Strength in Depth: strength in performance, allied to a depth of capabilities across a full range of services.

Survey Equipment

Technologically advanced solutions to support the offshore energy sector. Supply, installation, maintenance, training: all part of the Unique Group sales, service and rental package.

- Hydrographic, geophysical and oceanographic survey equipment
- Inertial navigation systems
- Surface positioning
- Subsea positioning
- ROV systems and sensors
- Underwater cameras and video
- Environmental monitoring solutions
- Navigation buoys and lanterns

Unique Group's acquisition of specialist marine survey company GSE Rentals has further broadened our capabilities in the provision of geophysical, hydrographic and oceanographic marine survey equipment.

Marine & Subsea

Bespoke products and services for marine, offshore and subsea industry operations. A specialist engineering proposition, underpinned by partnerships with leading global providers.

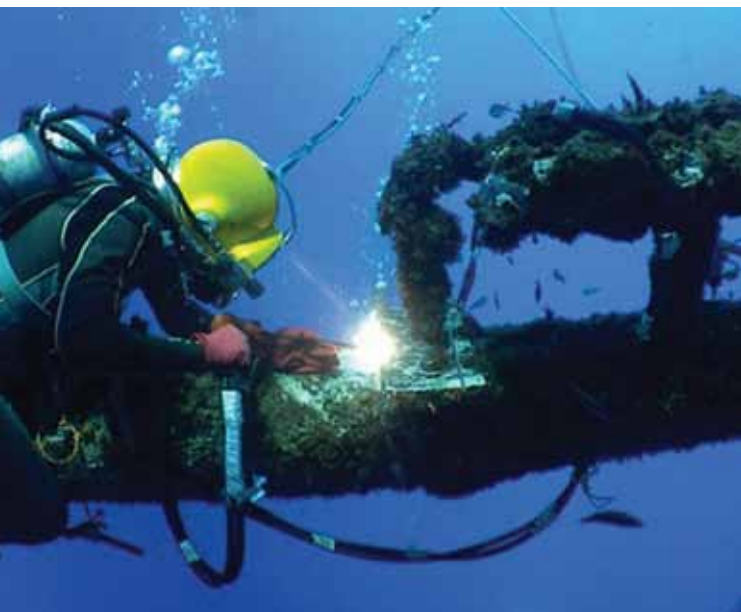

- Merchant Marine
 - Vessel Automation, Navigation and Control Systems
 - Safety Systems: CCTV, Life Boats, Rescue Boats
- Offshore Oil and Gas
 - Integrated Vessel Control System including Dynamic Positioning
 - Passive Fire Protection
 - Deck Machinery: Winches / Capstans
- Subsea
 - Cable / Riser Protection System
 - Hydroacoustic Positioning System

Diving & Life Support

HYDRA

Sales and rental of industry-leading equipment specifically designed to provide robust life-support equipment to our clients' requirements.

- Surface diving systems
- Saturation diving systems including DSV & HRF
- General diving equipment
- Naval diving and life support
- Medical life support systems
- Altitude life support systems

Buoyancy & Ballast

Best-in-class airbags and waterbags from our SEAFLEX brand are available for rental or purchase 24/7 via our global network.

SEAFLEX has been helping contractors execute their diving, salvage, installation and load-testing projects safely, efficiently and profitably since 1987.

- Air Lift Bags - for diving and salvage operations
- Inflatable Buoyancy Bags and Systems - for pipelaying and other shallow-water installation operations
- WaterLoad Bags - for testing cranes, davits and other structures
- Dedicated Lifeboat and Gangway Load Testing Bags - for loadtesting in enclosed spaces

On-Site Engineering

Engineering services and products defined by knowledge, experience and innovation. Maintain your plant operability - and minimise loss of production - with safe and cost-effective intervention work.

- Hot Tap, Line Stop and Pipe Freeze
- On-Site Machining Service, Sales and Rental
- On-Line Leak Sealing and Valve Maintenance
- On-Line Safety Valve Testing
- Decommissioning Services
- Pipeline Weld Testers and Plugs

Specialised Boats

Oceanwide SaS, the proven market leader in the design, construction and maintenance of self-propelled hyperbaric lifeboats and specialised offshore boats, is an integral part of Unique Group's Specialised Boats division.

- Our portfolio ranges from three sizes of Self-Propelled Hyperbaric Lifeboats (SPHL), both bottom and/or side-mating, Totally Enclosed Lifeboats (TELB) and Partially Enclosed Lifeboats (PELB)
- Specialised boats ranging from Fast Diving Support Craft (FDSCs), Rigid Hull Inflatable Boats (RHIBs), Diving Daughter Craft and boat deployment and recovery davits
- IRM (Inspection, Repair & Maintenance) on any type of hyperbaric lifeboat
- 1500m² production facility and workshop in Rotterdam

Global Operations

We provide a 24/7 global support service to manage our customer requirements, both onshore and offshore, with full service facilities across the Middle East, India, South Africa, Singapore, Europe, the UK and the USA.
