

Unique Group Survey Equipment

We are a specialist provider of technologically advanced survey and inspection equipment from leading manufacturers worldwide. We draw from more than 20 years' experience in the rental and sale of products for operations and projects in a diverse range of sectors internationally.

But we're more than a conventional supplier: we're equipped to add further value because of the broader service offering across Unique Group.

Technically, we provide specialist advice and support - 24 hours and 7 days a week – before, during and after your project.

Commercially, we work to build long-term relationships with customers and create an environment that inspires confidence, trust and security.

More than that, we apply the financial strength of Unique Group to invest in leading-edge technology that can provide you with a cost-effective solution – and a competitive advantage.

Logistically, we're ready to respond when your needs are urgent and time is short. Our customers operate all over the world, and we're primed to support them 24/7.

Unique Group is best positioned to meet customer requirements with full service centres in the USA, UK, the Netherlands, South Africa, the United Arab Emirates, Qatar, Saudi Arabia, India and Singapore supporting customers across Asia Pacific.

GSE Rentals is now part of Unique Group. The acquisition strengthens Unique's presence in non oil and gas markets, with a focus on offshore renewable energy projects, submarine cables, dredging, ports and harbours and civil projects.

Survey

Our portfolio of survey equipment is routinely augmented by the latest technology to ensure we have the solution you need.

For the **marine** market, our track record encompasses operations in ports and harbours, offshore renewables, cable installation and civil construction.

- Surface and Subsea Positioning Equipment
- Motion Sensors
- Geophysical Equipment
- Hydrographic Equipment
- Oceanographic Instrumentation
- Winches

Subsea

We provide state-of-the-art equipment in the areas of **subsea positioning, tooling** and **ROV sensors**, supporting all aspects of offshore operations.

- ROV Sensors
- Subsea Positioning Equipment
- ROV Tooling
- Multiplexors
- Leak Detection
- Pipe and Cable Trackers
- Video Telemetry
- Imaging and Profiling

IRM (Inspection, Repair and Maintenance)

Our comprehensive range of inspection equipment conducts all your subsea and topside inspection programmes.

- Ultrasonic Equipment
- MPI
- CP
- Eddy Current
- Flooded Member Detection
- Remote Visual Inspection
