

## Unique Group On-Site Engineering

**Wellube**

At Unique Group's On-Site Engineering Division, we are passionate in meeting and exceeding our customers' requirements in conjunction with the most stringent safety & quality standards every single time. We provide cost-effective solutions by combining unique and innovative engineering ideas to increase plant uptime – and save you time and money. We aim to be the service provider of choice in our specialist market: to deliver on-site engineering services and products that represent best value for you. Our experienced and well trained engineering team ensures to be there with you at every step of the way until the project is completed.

Our accreditations to ISO 9001:2008, ISO 14001:2004 and OHSAS 18001:2007 inspire added confidence among customers demanding the highest standards of support.

Our online and offline services and products are deployed in a diverse range of industrial operations. These include:

- Offshore & Subsea Facilities
- Cross Country Pipelines
- Power Production & Transmission
- Manufacturing & Production Plants
- Chemical & Cement Plants
- Utilities & District Cooling Networks
- Ship Building & Repair
- Airports & Infrastructure Projects

### Site Services

Our comprehensive range of online and offline services are designed to reduce potential risks and minimise downtime to your plant and facility assets – and, in the process, help you to achieve maximum production efficiency.

From concept to work execution, everything we do for you is performed by our trained and well experienced engineering team. We are ready to support projects around the world, 24/7.

- Hot Tapping & Line Stopping
- Pipe Freezing
- On-Site Machining
- Under Pressure Leak Sealing
- Composite Repairs
- Pipeline Repair Clamps
- On-Line Safety & Relief Valve Testing
- On-Line Valve Maintenance
- Under Pressure Valve Insertion
- In-Line & Flange Weld Testers

### Product Sales

Our team of experienced sales and technical engineers is primed to work closely with you, devising and delivering innovative solutions to meet the most demanding challenges.

- Self-sealing repair clamps for installation on onshore, off shore and subsea applications.
- Portable machine tooling systems - diamond wire saws, clamshell pipe cutting equipment with technician training packages and after-sales services.
- Mechanical or welded type hot tapping and line Stopping fittings as per international standards.
- On line safety valve testing equipment and training/ supervision packages.

### Customer Support Services & Rental Services

Our pool of on-site machining, heat treatment, decommissioning and pressure testing equipment and tools include:

- Diamond Wire and Articulating Saws
- Clamshell Pipe Cutting Machines
- Rack Drills & Rail Mills
- Pressure Test Plugs
- Inflatable Plugs
- In line Weld and Flange Weld Testers

With an international network of approved suppliers and operational bases, we are ready to support projects around the world – to deliver safe and cost-effective solution packages that meet your requirements, 24/7.
