

ABS Classed Containerised System & LARS delivered in Africa

Client	An African oilfield service provider
Date/ Year	2018
Service details	Unique Group's classed Containerised system SL 2.1 layout features a compact design by incorporating a 1500 deck decompression chamber and a dive control with a partitioned area into an ISO 20ft container. The Partitioned space gives the client the option of having either a gas bank or an umbilical storage with a stand-by diver seat within the area. The dive control could be fitted out for air, nitrox or mixed gas diving. For enquiries contact : diving@uniquegroup.com

Summary of the Project

Unique Group's Diving & Life Support division was appointed to provide ABS Classed System & LARS to Hydrodive, Nigeria.

Client Requirement

The client had asked us to supply two ABS Containerised Diving Systems and Launch & Recovery System for offshore operations.

Unique Solution we delivered

The two-container system Unique Group delivered consisted of a 20ft ABS DCON Containerised A1500 Chamber and Air Dive Control as well as another 20ft ABS MCON Machinery Container. The Machinery container consisted of 2 x HP compressors, 1 x LP compressor and 22 x HP cylinders.

In addition to the classed containerised systems, 2 x LR50A2 (ABS) 2-Diver open cage Launch & Recovery systems (LARS) were also provided complete with 2 x Emergency breathing air supply CABA Mask with comms; 6L cylinder, Harness and Hose which is an IMCA requirement. The diving system supplied was complete and ready to operate offshore.

Benefits delivered

- Compliant to ATEX and IMCA guidelines
- Timely delivery
- Customised as per client requirements
