

Water Weights

A Unique Group Company

Capability Document For Marine & Shipboard Lifting Systems

Water Weights water filled proof load bags are a unique, safe and highly certified product, specifically designed to provide test loads in place of traditional solid weights for all forms of load testing.

Cranes

Water Weights are extensively used in the testing of shipboard cranes in both military and commercial vessels worldwide. Bags when empty are easy to transport and come ready rigged saving both time and budget for equipment under test.

Lifeboats

Bag testing systems have been specifically designed to meet regulatory requirements for an evenly distributed load. Our remote system allows Proof Load Testing to be conducted safely, without the need for personnel to enter the craft during the loaded condition.

Davits

On instances when only the lifeboat davit requires testing, specially designed bags are used for suspended loads on the davits. Load is always measured with a certified load cell allowing for accuracy of +/- 1% of the load with a remote readout for added convenience.

Elevators, Platforms and Ramps

Uniquely designed bags are used for deck loads using any number of bags to achieve varying loads.

Flight Deck Netting

We recently developed bags for use on testing flight deck netting systems onboard ships, eliminating the need for a support crane during the testing process.

Capability Document For Marine & Shipboard Lifting Systems

Underway Replenishment and Winching Systems

Engineered procedure using bags on underway replenishment and winching equipment made an otherwise cumbersome procedure easy, safe and cost effective.

Turnkey Services

Water Weights maintain a flexible, skilled and motivated workforce, essential in providing a high level of service, and meeting client objectives even in remote places worldwide. Our comprehensive network of offices, partners and distributors ensure quality and service delivery to our highest standards.

Other types of testing include Gangways, Conveyors, Personnel and Freight Elevators, Floor, Accommodations Ladders, Anchor Capstans, Manlifts, Beams, A-Frames, Gantries and Pad Eyes

A call to any of our nationwide locations gets you support from our highly trained staff. We look forward to hearing from you.

***All applied loads are measured accurately with a fully certified load cell or flow meter.**
