

### Deck Comms Slave Unit

**Description:**

The KB-702 remote speaker station permits the user to select between two channels of party-line communications, with the ability to talk and/or listen on the selected channel. The user can listen via the integral speaker, or may use a headset or telephone-style handset and can talk via a headset microphone, a telephone handset, or a push-to-talk microphone.

**Features:**

- Selectable two-channel, full-duplex operation
- Microprocessor-controlled logic and switching
- Momentary / latching talk button
- Visual and audible call signaling, with bright LED indicator
- Use with headset or handset, with integral speaker for monitoring

**Specification:**

Width: 210 mm (8.5")  
 Height: 114 mm (4.5")  
 Depth: 44 mm (1.75")
