Head Set & Microphone for AGA**Description:**

Compatible with various full face masks and comprises of one fully moulded waterproof bone conductor, complete with cover plate incorporating fully waterproof microphone with EO or 2/4 pin connector. Nominal cable lengths are 12" (30cm)
 STS009-01: marsh marine enters on the divers left and the bone conductor exits on the right to the diver's right ear
 STS009-02: marsh marine enters on the diver's left and the bone conductor exits on the diver's left, thus allowing the bone conductor to be fitted against the diver's left ear; consequently avoiding bubble noise
