

DH157 Diesel Divers' Heater

Description:

The DH157 Electrical Divers' Heater is a robust and reliable 157kW IMCA compliant sea water heating system. It is suitable for situations where the vessel does not have the electrical power needed to supply the electric heaters.

specified by ASME VIII and IMCA.

Our helpful Sales Team can assist you with your requirements for divers' personnel hot-water suits and accessories.

Features:

- Sea water temperature is manually controlled and adjustable to within 0.5°C
- Equipped with over temperature safety cut-outs and mechanical inlet water regulators for ship water supply pressure variances
- IP65 rated and comes complete with a weatherproof cover and lifting slings
- Safety devices in place as

Specification:

Weight: +/-950kg
 Length: +/-1800mm
 Width: +/-800mm
 Height: +/-1600mm
 kW of Heating: 157kW
 Max. Temp. above Ambient: +/-45 °C
 Outlet Flow: 60 Ltr/min (at 60Hz)
 Outlet Pressure: 40 bar
 Power Requirement:
 3-Phase, 440VAC/60Hz or 400VAC/50Hz
 Electrical Amps Requirement: 10A

SBDH-400 Standby Divers' Heater

Description:

The SBDH-400 Standby Divers' Heater provides a backup hot water supply. The unit comprises of a 400 Litre fresh water tank that is maintained at an adjustable set temperature by heater elements. In the case of failure of the main hot water supply, the operator can change to standby hot water by activating a 3-way change over valve and starting the Standby Divers' Heater. The SBDH-400 can supply hot water for 8-10 minutes.

Specification:

Heating Capacity: 12kW (2 off 6kW elements)
 L x W x H: 1360 x 775 x 1660mm
 Weight: 600kg (with boiler tank full)
 Power Requirements: 20kW max, 440V, 60Hz, 32A
 Water Delivery Rate: 50lpm (±5%) at 60Hz
 Typical Outlet Temp Range: 0 to 60 °C
 Max. Operating Temp: 70 °C
 Water Supply: min 45lpm @ max. 40 bar
 Water Storage Tank Volume: 400 Ltr
 Duration of Standby Hot Water Supply: 8-10 min
