

**Full Face Mask - M-48 SuperMask®**

**Description:**

The patented Kirby Morgan SuperMask is a lightweight modular full face mask that allows for easy and rapid adaptation to various self-contained underwater breathing apparatuses as well as surface-supplied systems. The mask frame and rigid components are made of high-impact plastic. The

face seal is made of the highest quality silicone and conforms to the diver's face. The modular removable mouth pod is designed to quickly interchange allowing the diver multiple breathing gas options. The mask is also designed to accept various wireless communications configurations.

**Full Face Mask - EXO-BR® Mask**

**Description:**

The EXO Full Face Mask was designed for both surface-supplied and scuba diving. By enclosing the diver's eyes, nose and mouth, the EXO permits nearly normal speech when used in conjunction with most wireless, and all hard-wire, underwater communication systems. Its light-weight design allows divers to work long dives without jaw or neck fatigue. This mask has a modular communications design that permits rapid and simple maintenance. An optional Hard

Shell gives added surfaces for mounting lights, cameras, etc. The EXO-BR Balanced Regulator helps reduce the work of breathing for the diver. The regulator balances the intermediate air pressure against the valve, sealing pressure inside the regulator. This enables the regulator to instantly adjust to changes in line pressure. The Balanced Regulator provides improved breathing and is adjustable for a wide range of intermediate pressures between 100 PSI - 230 PSI.
