

**200m, Welding and Cutting Cable Reel**

**Description:**

Designed for the handling, storage and manipulation of long lengths of cutting and welding cable sets makes the hydraulically powered 200m welding and cutting cable reel great for heavy duty subsea applications. The cable reel is skid mounted and is powered through a hydraulic motor, reduction gearbox and chain drive. It features load holding hydraulic brake which is augmented by a mechanical brake on the gearbox input side. Deployment and retraction of the reel is achieved through a directional control valve integrated on to the reel. The cable reel also features a bulkhead plate through which electrical connections on the cutting and welding cable set are made. We can supply cutting and welding cable sets to suit your requirements as well as any power packs and welding inverters required to run the

reel. Our sales team is ready to offer assistance in satisfying your requirements.

**Features:**

- Hydraulically driven
- Safety guards
- Offers a neat and tidy solution for cables
- Large capacity reel

**Specifications:**

Line Pull (Max.): 350kg  
 Flange Outer Dia.: 1570mm (Nominal)  
 Core Dia.: 700mm  
 Core Width: 420mm  
 Drum Speed (Max.): 12RPM  
 Cable Capacity: 200m  
 Footprint:  
 Length: 2092mm  
 Width: 957mm  
 Height: 1945mm  
 Drive Ratio: 2:1  
 Gearbox Ratio : 6.2 : 1  
 Max. flow: 17l/min  
 Motor ΔP:100bar  
 Hydraulic Power: 3kW
