

**Broco SoftTouch, Welding Rods**

**Description:**

SofTouch electrodes are used for wet welding repairs in many applications where steel must be joined underwater according to code specifications. SofTouch welds consistently meet or exceed AWS D3.6-99

specifications for Class B welds in all positions (flat, horizontal, vertical and overhead). SofTouch is designed to pass all AWS test requirements, including radiograph, tensiles, bends and hardness.

**Order Detail:**

SoftTouch Electrodes- AWS E7014 Mild Steel, 1/8" Welding rod (95 Electrodes per tube) (UW-CS1)	D-ST-188
SoftTouch Electrodes- AWS E7014 Mild Steel, 3/16" Welding rod (48 Electrodes per tube) (UW-CS3)	D-ST-189
SoftTouch Electrodes- AWS E312-16 Stainless Steel, 1/8" Welding rod (95 Electrodes per tube) (UW/SS-1)	D-ST-190

**Broco EasyTouch, Welding Rods**

This is an easy to start, all position electrode that is easy to run (a controllable puddle with rippled bead appearance), is

easy to clean and has a high deposition. These electrodes fill the void between "to-code" work and economy.

**Order Detail:**

EasyTouch Electrodes- AWS E7014 Mild Steel, 1/8" Welding rod (95 Electrodes per tube) (UW/EZ-1)	D-ST-191
