

### BR 20, Underwater Welding Stinger

**Description:** This welding stinger is designed to hold the electrode at the optimum angle to the work piece delivering quality welds while reducing operator fatigue. The movable jaw design accepts a wide range of electrode diameters.

**Order Detail:**

Underwater Welding Stinger, Broco BR-20	D-ST-172
---	----------

### EH 400, Underwater Welding Stinger

**Description:** This wet-welding electrode holder is made for use with Hydroweld FS wet-welding electrodes and accepts a wide range of electrode diameters.

**Order Detail:**

Underwater Wet Welding Electrode Holder EH400 (Stinger)	D-ST-173
---	----------

### HVR 4401, Underwater Oxygen Regulator

**Description:** The HVR 4401 is a multi-stage oxygen regulator, which assures smooth flow at high volume and fits standard European and American cylinder valve connections.

**Order Detail:**

Regulator, High Volume Oxygen, Broco	D-ST-174
--------------------------------------	----------
