

BR 45 - T-handle, Light-Medium Duty Hydraulic Breaker**Description:**

The BR45 is a rugged, powerful and lightweight underwater breaker in the 40-55 lb class. It is used for light to medium concrete, rock and coral breaking and removal. It features a feathering on/off valve that controls speed and allows for easier initial tool placement.

Features:

- T-Handle with large on/off trigger for precise control
- Stainless Steel spool and fasteners
- Trouble free diaphragm accumulator provides additional blow energy and reduces recoil
- Feathering on/off valve allows easy initial tool bit placement
- Uses standard 1" x 4 1/4" hex shank tool bits
- Four tie rod design for durability

- Operates in any position
- Modular design for ease of service
- Latch retainer
- Painted hi-visibility yellow

Specifications:

Performance: 1525bpm @ 8gpm
 Steel Capacity: 1" x 4 1/4" Hex
 Handle Type: T-Handle
 Circuit Type: Open Center
 Flow Range: 7-9gpm / 26-34lpm
 Optimum Flow: 8gpm / 30lpm
 Working Pressure: 1500-2000psi / 105-140bar
 Full Relief Setting: 2250psi / 155bar
 Weight (less tool bit): 43lbs / 19.5kg
 Length: 25" / 63.4cm
 Width (at handles): 14" / 35cm
 Hydraulic Ports: - 8 SAE O-ring
 Hose Whips: Yes (3 /8" NPT Male thread)
