- Width: 35mm
- Weight (with connector): 175g in air and less than 100g in water
- Power Supply: 16-28VDC, 15Watt
- Manufacturer: Oceanvision Pte Ltd

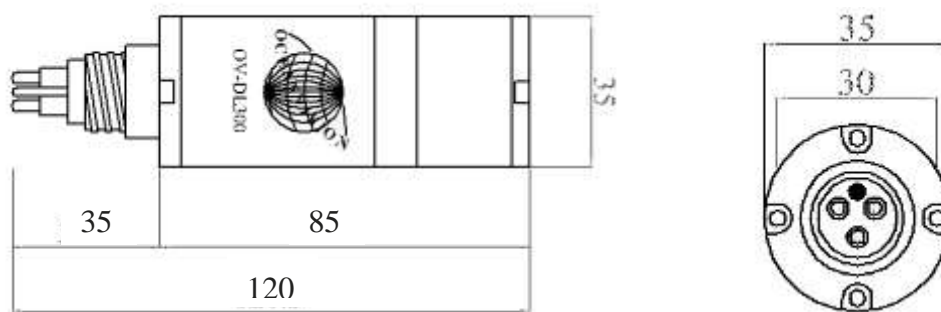

## General Description

This mini LED Diver's light is the perfect choice for the commercial diving industry presenting a very cost efficient marine grade LED Light. Its wide angle illumination makes it ideal for diving as it reduces the reflection in the water compared to existing LED lights on the market. It is manufactured in Black Delrin with built in anodized heat sink aluminum to avoid damage to the camera if not switched off instantly when out of water. The perfect choice for a "plug-and-play" Solution. The standard connector used is a 3pin micro male bulkhead type MCBH3M but other types can be delivered upon request. The unit can also be delivered with suitable flying lead cable instead of bulkhead connector.

## Configuration(s):

- Standard PN 903248
- Customer specified connector and/or bracket "-1"
