

Underwater Lamp

OV – QHL3001

General Description

Oceanvision's versatile underwater halogen lamp is rated for use in up to 3000m. This lamp can either be delivered in stainless steel 316L or in anodized aluminum. The lamp comes with a protective reflector. The QHL3001 lamp is designed for use on Remote Operated Vehicles (ROV), as well as for fixed sub-sea installations. Its robust design makes it a perfect choice for harsh environment and rough handling. The unit comes with BH3M Sub connector as a standard, but other types can be supplied upon request.
