

PRODUCT REPORT

Proof Load Testing Bags

WATER WEIGHTS®

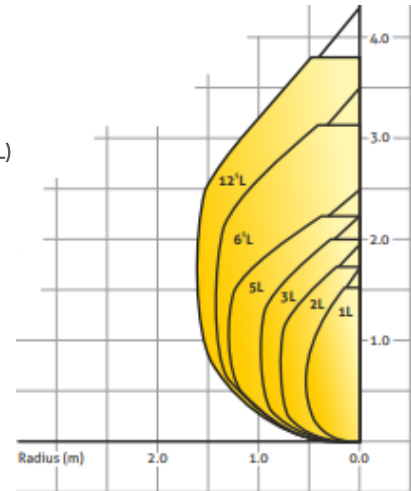

Low Headroom Type Water Bags

WATER WEIGHTS® proof load bags can be used for testing cranes, beams, davits or any lifting equipment and applied across the marine, industrial and engineering sectors.

For smaller test loads where the available height is restricted our Low Headroom type are a flexible solution for the job. The slightly wider body allows the bag to have a shorter design, resulting in a bigger test load within less height

Several types between 1.0 and 12.5 metric tonnes are available in our Low Headroom range. Using specially designed spreaders, multiple bags could be combined to achieve all kinds of test loads.

Specialist low headroom bags (L) are available for testing where headroom is restricted.

Specialist Low Headroom Bags

General		Stored / Transported						When in use / filled			
Type no	SWL	L x W x H (Mtr)	L x W x H (Ft)	Packed Wt (Kg)	Net Wt (Kg)	Net Wt (Lbs)	Empty Ht (Mtr)	Height (Mtr)	Height (Ft)	Dia (Mtr)	Dia (Ft)

WATER WEIGHTS®

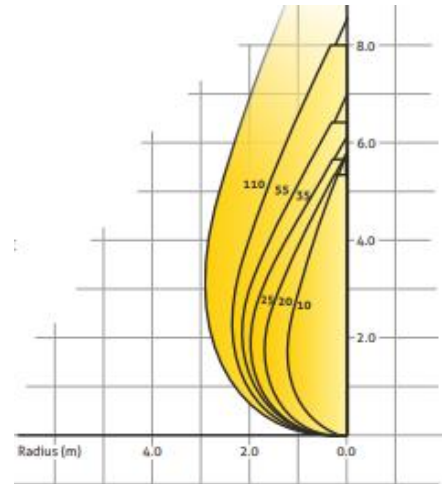

Proof Load Bags

WATER WEIGHTS® proof load bags have become standard equipment for load testing across all the industries. This highly engineered and certified system allows a safe, practical and economical method for all sorts of load testing.

The idea is simple, safe and adaptable, which means you can deploy it practically anywhere – indoors and outdoors, onshore and offshore.

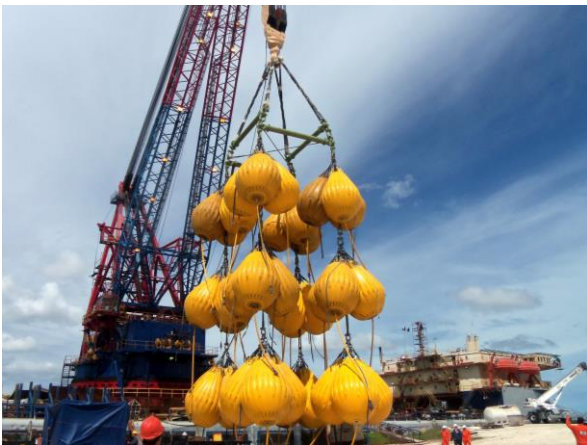

WATER WEIGHTS® water filled proof load bags are available up to 110t capacity. For load tests and advanced layouts, our service team can assist with engineering and rigging.

Standard shaped bags (S) have the shape of a rain drop, which is the most natural shape for a flexible water container.

Standard Load Testing Bags
