### HLK-4600 Camera Boom Arm With Pan & Tilt:

The HLK-4600 Camera Boom Arm has been designed for pipeline inspection work. Using a pair of these arms, pipelines of up to 36" can be easily inspected. Its unique design allows the camera mount to stay at the same angle through the entire 120° of angular movement of the arm, without any adjustment. The camera mount can be tilted through a 120° and rotated through 360°. The arm uses Hydro-Lek's standard HLK-1300 hydraulic cylinders and HLK-2150 Pan & Tilt.
